www.bunyaoman.com

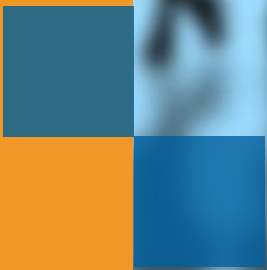

Welcome To Bunya

Bunya was formed in 2022 by ethical, highly professional, knowledgeable, experienced and eminent team to come up with a sustainable continually improving predictable and cutting-edge quality specialized services and projects while concurrently fostering lasting relationships with all stakeholder.

Our highly experienced management and engineering teams work in close collaboration with clients, project managers and principal consultants from preliminary design to ultimate completion.

Our Vision

Is to support reliable infrastructure to facilitate digital transformation in the country.

Experience

Qualified executive Management with over 30 years of experience in Telecom field.

We Have A Great Mission

To build capacity to assure and nurture SMEs through mentoring and coaching leading to local communities being sustainable, secure and happy.

Integrity

Integrity is our first core value and a foundation for others! People tend to have a strong moral code and take responsibility for their actions in their personal life. We as a company wanted to reflect that same integrity in our way of doing business.

Safety

Safety is our first priority at every stage throughout our projects from the design and planning stages throughout completion.

Quality

Bunya strives to provide high-quality services and products that meet the expectations and requirements of its customers and suppliers.

Our People

Bunya treats its human resources as a business partner because they are the sole of the company and the main driver in delivery of our services, projects and solutions to our clients. In order to ensure that every individual is equipped with the right knowledge, skills and attitude, we collaborate with our sister company TDTA to deliver further training and development with comprehensive specialized training program desiring to constantly upgrade our people in safety, technical and management skills.

We believe firmly in providing the right training, accredited certification and practical knowledge for our people in order for them to execute their duties and responsibilities confidently.

Eng. Aiman AL Salmi

Chief Operating Officer

"In our organizational framework, we adhere to the principles of the triangle theorem, where the sides are interdependent—altering one side inevitably impacts the others. As the Chief Operating Officer (COO), I have chosen to define the sides of our organizational triangle as Quality, Time, and Cost. Just as in the theorem, adjustments to one element will have corresponding effects on the others, emphasizing the delicate balance we strive to maintain."

Our Strengths

Bunya is a newly established company which focuses on a range of Telecom Infrastructure projects, such as tower erection, auditing, quality assurance, project management, and tower maintenance. In addition, it focuses on capacity building to assure and nurture SMEs through mentoring and coaching.

Our Services

**Maintenance of
networks**

**Communication
equipment maintenance**

Full Telecom Site Build

**Site Kick off, Site Access Road,
Site leveling, Site Foundation,
Boundary wall, Cabinet
Foundations, Power Connectivity,
Tower erection, Gate Installation.**

Tower erection

Bunya provides communication tower erection services build communication towers, set up satellite dishes, and install related communications equipment. We also provide design engineering, structural analysis, and line testing services.

- ◆ Site surveys and evaluations
- ◆ Tower reinforcing and painting
- ◆ Radio frequency (RF) mapping
- ◆ Antenna and line sweeps

Our analysis involves the selection of tower styles and materials of construction. Site surveys identify potential tower locations and evaluate the impact of regulatory requirements. Tower reinforcement may involve the replacement of round tension rods with angled components that can increase a tower's loading capabilities. Antenna and line sweeps verify the proper functioning of an antenna and its line feeds.

Tower maintenance

We are committed to provide flexible, integrated, dependable, cost effective and responsive solutions for the operation and maintenance requirements.

Our tower maintenance services includes:

Landscaping

Access road repair

Storm damage repairs

Plumb and tension

Cathodic protection

Troubleshooting

Anchor replacement

UPS battery replacement

Paint, primer, and rust removal

Grounding system replacement

Site Audits

Routine inspections are necessary to ensure your tower's integrity and longevity as strong storms, vandalism, or other extreme conditions can result in structural damage, missing hardware, and loose bolts.

To help you avoid these outcomes, Bunya will rapidly deploy highly-skilled climbers to inspect your monopole, self-support, guyed, or stealth towers. Certified inspectors provide ongoing communication and deliver closeout documentation promptly.

One-Stop Provider for Your Last Mile Connectivity Needs

Instant access to high-performance last mile and local connectivity in all locations without having to deal with multiple service providers and contracts

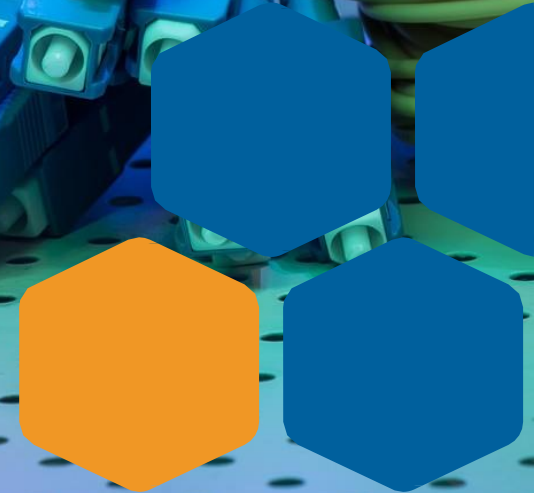

Last mile fiber connection

Home fiber connection

Bunya provides high speed home fiber connections and infrastructure services.

Quality assurance and projects management

We believe firmly in providing the right training, accredited certification and practical knowledge for our people in order for them to execute their duties and responsibilities confidently.

Project Management and Execution

- 01 Create detail schedule and resources plan to meet client's projects objective
- 02 Communicate clearly with projects stakeholders
- 03 Track project progress and fine-tune deviations
- 04 Supervise closely on quality of work executed
- 05 Complete and commission the project on time and providing FAC certificate

Communication equipment maintenance

Bunya network maintenance team is ready to maintain your systems equipment & network infrastructure in order to help maximize your up-time and quality of service. Our experienced maintenance technicians and support personnel are intimately familiar with the complexities involved when maintaining equipment that's a crucial piece of a system in an operational environment.
